

heading the other way banked back up from Dandenong Road.

Should an emergency vehicle endeavour to get to Monash Medical Centre, it would almost be impossible either way.

How many feasibility studies have there been into the construction of an overpass?

Elaine Layton, Clayton

Residents want pool

I SENT an email to Monash coun-

cillors regarding delaying consultation for Oakleigh pool. Part of a reply stated that council is aware of what Community Life Action Group wants, but it also has to consider the views of other Oakleigh residents.

Well, who do they think CLAG represents?

We represent Oakleigh and every person who wants to save our pool, everyone who has signed numerous partitons, we represent the people discussing the pool at

family gatherings, in school grounds and at sports events.

We represent every person who has signed up to receive newsletters from the clag.net.au website.

My family has been promoting the pool's plight at the Rotary Oakleigh Sunday Market. We speak to many many people of Oakleigh. Even people who no longer need or use the pool want it kept for younger generations.

So my question to the council is, who are the other people to ask?

Maybe you should spend as much time in Oakleigh out among the people as I do; then maybe you would understand just how big the support is for the pool.
